

## Information regarding camera surveillance at Elos Medtech Skara AB

At Elos Medtech Skara AB (hereinafter "Elos"), we have CCTV (closed-circuit television) monitoring our production equipment (injection molders, robots, etc.). The cameras are pointed at the part of the production equipment that is suspected to be or has been problematic. This means that you as an individual may appear in the video recordings if you are in the vicinity of or performing service and/or maintenance on our production equipment, even though this is not the purpose of the CCTV. Instead, the purpose is to detect and identify faults in order to improve our products. Accordingly, the CCTV system is necessary for purposes relating to the legitimate interests of Elos.

The cameras record video 24 hours a day, 7 days a week. These recordings are kept for a maximum of 7 days, after which they are written over by new recordings. No audio is recorded, as it is not considered necessary for this type of troubleshooting.

IT and production staff at Elos have full access to the recorded material and may save video clips that are of interest for troubleshooting purposes.

Certain video clips from the recordings relevant to the purpose may be saved and shared with the suppliers of the production equipment being monitored. Saved video clips featuring individuals are not sent to our suppliers; only video clips featuring the production equipment alone are sent.

Saved video clips are kept for as long as necessary for the purpose of the CCTV use.

If a video clip featuring an individual who is not employed by Elos is saved for more than 7 days, the concerned individual is informed.

**By entering our production facilities, you are aware of and accept that you may appear in video recordings made by our CCTV system when you are in the vicinity of our production equipment.**

Your rights:

- You have the right to object to the processing of your personal data that we perform on the basis of our legitimate interests.
- You have the right to request the erasure of the video recordings/clips in which you appear in cases where the video recordings/clips are no longer necessary for the purpose for which they were made or if you believe that our need for the video recordings/clips does not outweigh your interests and we cannot provide compelling legitimate reasons for the processing.
- You have the right to request a copy of the video recordings and clips that we process in which you appear. Such copies are provided free of charge.

If you believe that we have breached any law, regulation, or agreement, please contact Mathias Andersson (see below), or report the incident directly to the Swedish Authority for Privacy Protection ([www.imy.se](http://www.imy.se)).

**For additional information about our CCTV system, or if you have any questions, please feel free to contact:**
